

## Section 6.1: Notifications

### **PURPOSE AND POLICY**

Once the grant program manager has submitted the grant application, the grant program manager will await a funding decision. The decision may take a few weeks or it may take several months depending upon the complexity of the program and application receipt, review and award process (see [GMM-Grantor Chapter 6](#)). Once the decisions are rendered, the grantor will send notifications to the applicants informing them whether their applications were (or were not) approved for funding.
