

## Chapter 6: Award Decision

Grantor program staff coordinates the grant application review process (see [GMM-Grantor Chapter 6](#)). Once the final funding decisions are made, the grant cycle enters the award phase. This chapter discusses the steps taken once the funding organization has made a decision regarding which applications to fund (and which will not be funded). [Section 6.1](#) discusses the award decision notifications to applicants. [Section 6.2](#) describes the processes for setting up for grant awards. All notification documents must be included in the grant program file in eCivis as these are public records associated with the grant application.
